Certified experience in creating interactive and innovative user interfaces with Dot Net performance and efficiency, I specialize in building robust and flexible systems using .NET. My expertise includes developing APIs, managing databases, and implementing best practices to ensure security and high performance, Experienced .NET backend developer Proficient in C#, ASP.NET, SQL Server, and other .NET technologies, Strong understanding of software design patterns, data structures, and algorithms, Familiar with Agile development methodologies and best practices.

Education

Bachelor Degree of Information System,
Faculty of Computers and Informatics, Suez
Canal University. Grade good, 2016 – 2020.

Skills

Soft Skills

- Results-oriented.
- Revenue generation.
- Business development.
- Effective marketing.
- Problem solving.
- Communication Skills.

Web Development Skills

- HTML / CSS / JavaScript / bootstrap
- Asp .net core / MVC Razor Pages / Blazor
- LINQ / Entity Framework
- GIT / GITHUB
- RESTFUL API / Postman
- Version Control system (Git,GitHub).

Database skills

- MYSQL
- SQL SERVER
- Oracle
- SQLite

Infrastructure Courses

- CCNA - MCSA
- VMware VCA , VCP
- Exchange Server
- RedHat Linux Administration
- AZ104 , AZ400
- Linux Bash Scripting.
- IIS
- Docker
- PowerShell Bash Scripting

Projects

1- Shop Management system (Web Application).

- Admin Dashboard to add products and offers.
- Customer interface to buy products
- Integrate stripe payments
- GitHub Link : [ahmedkh12/MyShop \(github.com\)](https://github.com/ahmedkh12/MyShop)

2- Ticketing System (Web Application).

- Admin Dashboard to Handle any request related to customer
- Customer can review Cases Logs with date and time.
- Integrate user asp.net identity
- Integrate email notifications
- This application first build with PHP then Migrated to asp.net core code with the same function and some additional developments

GitHub Links :

PHP Code : [ahmedkh12/servicedesk: This Application used to support company which have Help Desk Managment that help to solve problems \(github.com\)](https://github.com/ahmedkh12/servicedesk)

ASP.NET Code : [ahmedkh12/TicketingPortal \(github.com\)](https://github.com/ahmedkh12/TicketingPortal)

3-Student Management System (Web Application).

- Manage all Students Information and data with all CRUD
- Upload Courses details to modify student's courses
- Manage reports related to Students
- Link : [ahmedkh12/Student: Simple student system \(github.com\)](https://github.com/ahmedkh12/Student: Simple student system)

4-Youtube Dowloader (Desktop Application).

Download YouTube playlist without limit by some integration with google API key
Link: [ahmedkh12/UdownloadList \(github.com\)](https://github.com/ahmedkh12/UdownloadList)
